Ethical questions about Mechanical Turk

Amazon Mechanical Turk: Gold Mine or Coal Mine?

Karën Fort*  
INIST-CNRS/LIPN

Gilles Adda**  
LIMSI/CNRS

K. Bretonnel Cohen†  
U. Colorado School of Medicine/U. Colorado at Boulder

Recently heard at a tutorial in our field: “It cost me less than one hundred bucks to annotate this using Amazon Mechanical Turk!” Assertions like this are increasingly common, but we believe they should not be stated so proudly; they ignore the ethical consequences of using MTurk (Amazon Mechanical Turk) as a source of labour.

Manually annotating corpora or manually developing any other linguistic resource, but not of humans only, is a source of labour, which we think might be unnoticed.
Here's an excerpt from an IRB application Chris Callison-Burch posted - "We will pay participants small sums of money to complete our tasks, ranging from $0.01 to $1. All participants can choose for themselves whether the compensation is fair, and opt not to do it if they deem the compensation to be too low. Amazon's Mechanical Turk has many other researchers and companies offering tasks, so we will offer compensation that is similar to what others offer."

He first refers to Amazon's Mechanical Turk as "an online labor market." And that, I agree with. It is an online labor market.

**Requesters like him**, and CrowdFlower, **collude**, explicitly or implicitly, **to keep wages at a substandard level** that is compatible with existence standard.

Unlike Jewels, I don't blame workers for taking low paying jobs. I can't blame a person for being needy enough to take what amounts to a crust of bread. **I blame Chris Callison-Burch, and others like him, for keeping the standard wage at crust of bread level.**

I feel like Maria in "Metropolis."
I tried one of those to see, I gave it up at 4 minutes in and about 2/3 of the way through. For the whole hit, I'd have taken about 6 minutes. 10 hits an hour - **$1.70 an hour**. Restricted to U.S. residents.

This is far too low to be considered a fair wage for a U.S. resident. My performance may be very far off from what others can do. Perhaps I took 4 times or more as long as an average worker would.

My complaint is that any U.S. requester knows what wage rate is required for a U.S. resident to survive. We may not agree on an exact number. But as they say, I know a fair wage when I see it, and this is not it.

Mturk is actually much smaller than what it can appear to be. Something close to requester monopoly has the power to keep wages low. Requester co-operation, explicit or implicit, reinforces this.

Chris Callison-Burch is not unaware, I think, of the mechanics of the wage structure of Mturk.
WORKERS OF THE WORLD UNITE!
Web Workers Unite! Addressing Challenges of Online Laborers
Bederson and Quinn (ALT CHI 2011)

The ongoing rise of human computation has created an environment where human workers are often regarded as nameless, faceless computational resources. Some people have begun to think of online tasks as a “remote person call”.

Unfortunately, as with any labor market, once humans and money are involved, a host of problems surface. From privacy breaches to unpaid or underpaid labor, there are real social risks that arise with the use of these technologies.

It is our responsibility to address them since it is designers, not ethicists or policy makers, who have the power to influence what is built and to mitigate risks before any harm is done.

What sucks about the MTurk worker interface?

- No way to search by expected hourly rate
- No way to estimate the difficulty or length of time that it will take to do a task
- No way to know how reputable a requester is in advance
- No way to know how long until they will pay
- Information asymmetry, imbalance of power

Workers rate Requesters based on a Requester’s:

• **communicativity**: How responsive has this requester been to communications or concerns you have raised?

• **generosity**: How well has this requester paid for the amount of time their HITs take?

• **fairness**: How fair has this requester been in approving or rejecting your work?

• **promptness**: How promptly has this requester approved your work and paid?
Choose the best category for this government project (good english important)

Requester: The Public Group

**Scores:**
- Communicatvity: 1.17 / 5
- Generosity: 1.73 / 5
- Fairness: 1.39 / 5
- Promptness: 1.86 / 5

What do these scores mean?

Scores based on 81 reviews

Report your experience with this requester »

---

Took a leap of faith on this requester and was rewarded with a %50 reject rate and a broken search feature and no feedback. Would not recommend, even if you have thousands of HITs under your belt to cushion the inevitable rejections.

Aug 29 2013 | KBH19 | flag | comment

---

Arbitrarily rejected over half of the hits I submitted, and then banned me from submitting any more hits for them. I suppose that's a blessing in disguise though, as I had no intention of doing any for them again after the first batch of rejections.

Aug 21 2013 | bour...@g... | flag | comment

---

Their HIT is very unclear. There is an option to browse for the result, but it does not work.

Aug 20 2013 | jeff...@g... | flag | comment
For those of you who know Arabic, this is a very solid requester with a very fair pay. Highly recommended for those who want to make some real money. Payment usually take one week depending on the HITs you are doing.

don't waste your time trying to submit machine translated crap, or random answers to multiple choice questions, you will get blocked instantly.

--------------------

Jul 27 2013  | hala...@h...  | flag | comment

Chris is one of the better requesters on MTurk, if you meet his qualifications and actually do the work as he requires. Glad to see that someone out there can finally work on those Arabic translation HITs that we've all seen for months now.

Jul 27 2013  | baudelai...@m...  

Good requester. Everything approved in a couple of days. I had no problems. This is a safe requester to work for.
Did about 50 of these earlier and was a little weary based on reviews. They all approved which was good for me, but I hope the requester doesn't do the majority rule thing anymore. It seems that's why many got rejected and he doesn't seem to respond to others so do at your own risk.

Jan 19 2016  | dancab...@y...  |

**HIT(s):**
Determine whether or not sentences are true; Translation from Russian to English

I've done a few of the "Determine whether or not sentences are true" HITs for this requester, which were great, paid fairly, in my opinion and took just a couple hours to approve and pay. I also did many translations from Russian to English and all of them got approved. Pay on these varies because it's 4 sentences per HIT for 30c but sometimes sentences are very long, sometimes very short.
Turker Nation discussion boards

- A watering hole for Turkers to discuss MTurk and Requesters
- Has a Requester Hall of Fame / Shame
- Lots of engaging conversation
- Sometime people vent their frustration
crowd-workers.com

• I am developing a browser plug-in that will improve the MTurk UX for Workers

• The idea is to track and aggregate statistics across many workers, so that they have better information

• Academically, I am interested in these questions

  a) How much time does the average Turker spend working?
  b) What is their hourly rate?
  c) How reputable are requesters (what fraction of the HITs do they approve v. reject)?
  d) How much time to workers spend searching v working?

</table>
Workers’ concerns

- Wage issues: unfairly rejected work, slow payment, and payments that do not fairly reflect the work that they performed
- No appeals process for unfairly rejected work. Requestors can unresponsive.
- Grass roots tools, user-maintained ratings/blacklist of requestors
Requesters’ concerns

- Quality: Workers may do substandard work or more blatantly cheat
- Cheating by randomly clicking or typing, using scripts to enter useless input, or giving answers that are not useful, but just relevant enough to get payment
- No ability to judge workers’ skills or qualifications in advance
- Often difficult to automatically judge the quality of work
System Design Guidelines

Bederson and Quinn (ALT CHI 2011)

- Provide **hourly pay** and **disclose the expected wage**
- **Value workers’ time** and optimize tasks to use worker’s time effectively
- Use **Objective quality metrics** to approve or reject
- **Give immediate feedback** to workers on their quality, and warnings to problematic workers
System Design Guidelines
Bederson and Quinn (ALT CHI 2011)

• Define **payment terms** including how quickly payments will be paid, and follow them.

• **Provide a grievance process** for workers who were treated unfairly. Removes the imbalance of power.

• **Provide task context**: Makes work more satisfying to workers, and lets them make informed ethical choices about what work to do.

• **Limit anonymity**: Anonymity of requestors enables them to reject work with impunity. Anonymity for workers enables them to cheat with nearly no risk.
Who are the Turkers?

- Requesters are given very little information about Turkers - basically just a serial number
- No names, no demographic information (like what languages they speak)
- Who are these people who work for us?
Who are the Turkers?

• Post a HIT to interview them!

• Panos Ipeirotis has a nice demographic survey on his blog “A Computer Scientist In Business School”

• Age, Gender, Education Levels, Marital Status, Household Income, Weekly earnings. **Why do you it?**

• India versus USA
Weekly hours, earnings

- $10-20
- $20-50
- $50-100
- $100-200
- $200-500
- $500+
Why do you do it?

I use MTurk to kill time

Primary source of income

I participate on MTurk for fun

Secondary source of income or for pocket change

Fruitful way to spend free time and get cash (instead of TV)
**Observation:** 40% of US-based Turkers said they did it for fun. (Ipeirotis study)

**Conclusion:** Turkers do HITs because they like them, regardless of what the pay is.
Turking for Fun?

danturker
This attitude would be requesters dream come true. The workers come here to have fun and play and the lousy pay for work is not an issue. This attitude helps create low pay for the AMT work force that does care about fair pay.

larak56
I agree with most everyone here. While I do find some of the HITS fun and actually learn an incredible amount by doing HITS, I do it for the cash.
Assumption: MTurk is a pure form of market that falls into a fair equilibrium. Bad employers and workers are rooted out as their poor actions become visible. Wages or pricing settles to a ‘natural’ level.

Conclusion: "apparently half a million people find work at pay rates they’re entirely happy with but pay rates that are below minimum wage"

–Tim Worstall, Forbes blogger
Pay Expectations

jimtexan79
I was hoping to make at least $3,650.00 (you know, 10 bucks a day) but, alas, I fell short. I blame all those summer months that I slacked off. :[
So, how much didja make? Was it what you hoped?

mwanza57
I made $1,179. Would love to double that for next year.

bubbles
$14,476.93 Hoping to do better this year.
It is a full part time job for me. I can turk during slow periods at my day job and from 4-10 during the week I turk. Because of pay cuts at my day job I would have to be working a part time job outside the home if I did not turk. And yes, my boss is aware of my activities and when they cut our pay the last time, he openly told us that if we can find other work that he would be flexible in allowing it. Just trying to hold on until the housing market rebounds and keep the company in business. It is cool of him to allow it, but I would much rather have my salary back and drop turking.
I am having a hard time. Mentally, spiritually, physically, and especially financially. My roommate has been out of work for almost 2 months, and ran out of money a few weeks ago... I have to come up with $$ if he can't to keep this roof over my own head. And he does now have a job that he is in training for--tho he will not see any money from it for a few MORE weeks. In the meantime, rent is due today, and I don't have all of it. I am going to have to beg the office to take what I do have, and let me pay the rest next paycheck. I could stand that, if that were all there was, but the power and internet need to stay on, or NEITHER ONE OF US will have any income. I paid the power right before cut off last time--that means it can't be long before cut-off notice comes a-knockin again. I know the internet bill is like that too now... I have been beating my head in trying to do more turking, more anything online [ ... rest of post omitted... ]
Jobs in the sharing economy
In Search of Uber’s Unicorn

The ride-sharing service says its median driver makes close to six figures. But the math just doesn’t add up.

By Alison Griswold

An Uber driver waits for customers in his car in Beverly Hills, California.
UBER DRIVERS

Read here about an important lawsuit brought by Uber drivers to recover the tips they should have received and reimbursement for expenses

Uber drivers have filed a class action lawsuit claiming they have been misclassified as independent contractors and are entitled to be reimbursed for their expenses that Uber should have to pay, like for gas and vehicle maintenance. The lawsuit also challenges Uber’s practice of telling passengers that the gratuity is included and not to tip the drivers, even though you are not getting a tip!!

THIS CASE HAS NOW BEEN SET FOR TRIAL IN JUNE 2016!

We won a major victory on March 11, 2015, when the judge overseeing the case, Judge Edward M. Chen, of the federal district court in San Francisco, denied Uber’s motion for summary judgment! In his decision, the judge agreed with many of our arguments about why Uber drivers may be properly classified as employees. Under the court’s order, the case will go to trial before a jury. See the news stories below for reports on the ruling.

We won another important victory on December 9, 2015, when the court issued its final order certifying the case as a class action. Under this decision, the case will now include all drivers who have contracted with Uber directly and in their own name (not through intermediate companies) in California since 2009.

In order to join our list of drivers interested in the case, and to sign up for us to represent you individually in the event that we need to pursue individual cases (such as in arbitration) to collect any wages that may be owed to you based on Uber’s misclassification of drivers, PLEASE CONTACT US to obtain a form to return to us.

Shannon Liss-Riordan
Adelaide Pagano
Misclassification of employees as independent contractors is found in an increasing number of workplaces in the United States, in part reflecting larger restructuring of business organizations. When employers improperly classify employees as independent contractors, the employees may not receive important workplace protections such as the minimum wage, overtime compensation, unemployment insurance, and workers’ compensation. Misclassification also results in lower tax revenues for government and an uneven playing field for employers who properly classify their workers. Although independent contracting relationships can be advantageous for workers and businesses, some employees may be intentionally misclassified as a means to cut costs and avoid compliance with labor laws.

The Department of Labor’s Wage and Hour Division (WHD) continues to receive numerous complaints from workers alleging misclassification, and the Department continues to bring successful enforcement actions against employers who misclassify workers. In addition, many states have
